SUMMARY

Frontend Developer specializing in React with a passion for building responsive and user-friendly web applications. Experienced in developing production-style projects with a focus on clean code, reusable components, and smooth user experiences. Always eager to learn, improve, and solve real-world problems.

SKILLS

Tools & Languages: JavaScript, ReactJS, React Router, Redux Toolkit, Html & CSS

Others: Git, Github, Basic Linux

Communication: English, Hindi (native speaker)

EXPERIENCE

Frontend Developer Intern | iNeuron

Jan 2023 – March 2023

The Fade (E-commerce Platform)

React JS • Zustand • React Router

- Developed a fully responsive e-commerce frontend using React and Tailwind CSS.
- Built reusable UI components for product listing, product details, and shopping cart workflows.
- Implemented client-side state management using Zustand for product listings, shopping cart, and checkout.
- Improved component reusability through modular architecture and clean code practices.

Frontend Developer Intern | iNeuron

ResumeHub (Resume Builder)

React • Zustand • Tailwind CSS • REST APIs

- Collaborated in a two-member team to build resume builder application.
- Led frontend development using React, Zustand, and Tailwind CSS.
- Implemented authentication, protected routes, form validation, and dynamic resume editing.
- Integrated REST APIs with the backend to deliver a seamless user experience.

PROJECTS

Blog Platform | *React, Appwrite, Redux Toolkit, Tailwind CSS, TinyMCE*

- Built a full-stack blog platform with secure authentication, role-based access, and complete CRUD functionality using Appwrite.
- Integrated a rich text editor (TinyMCE), image uploads, dynamic slug generation, and responsive post management workflows.
- Developed reusable React components with Redux Toolkit for state management and React Hook Form for efficient form handling.

TaskFlow - Productivity Manager | *React, Redux Toolkit, Tailwind CSS*

- Built a responsive task management application supporting task creation, editing, deletion, filtering, and status tracking.
- Implemented centralized state management using Redux Toolkit for predictable data flow and scalable component architecture.
- Designed reusable React components with responsive layouts and local data persistence for a seamless user experience.
- Focused on clean UI, modular code organization, and performance optimization following modern React development practices.

EDUCATION

Bachelors in Computer Application | Lovely Professional University

Diploma in Computer Science | Allahabad College Of Engineering & Management
